Cedarbrook Trail Reopens After Storm Repairs

Cedarbrook Wildlife Reserve's main circular trail reopened to the public on Saturday, three weeks after a spring storm brought down branches across several sections of the path. Rangers closed the whole 3.5 km loop for safety while the damage was assessed.

The worst damage was at Old Oak Bridge, the wooden crossing over Cedar Beck near the halfway point of the loop, where a falling branch cracked two of the main support planks. A team of twelve volunteers joined the reserve's three rangers over a single weekend to replace the damaged timber and reinforce the handrail.

Since reopening, visitor numbers have already begun climbing back towards their usual spring level, helped by clear weather and a new set of trail signs installed during the closure.

Question 1

English / Creative comprehension

standard

1 mark

Paragraph 2

According to the report, how many volunteers joined the rangers to repair Old Oak Bridge over the single weekend?

A 3

B 20

C 15

Head Ranger Elena Okafor said the repair work had also given the team a chance to protect the reserve's breeding herons early. 'We've used the closure to put up a temporary screen around Heron Hide,' she explained. 'The birds are nesting a little earlier than usual this year, so we're keeping that section quieter until the chicks fledge.'

The reserve is marking the reopening with a free guided walk starting from the Visitor Centre on the last Saturday of the month, tracing the full loop past Otter Pond, the repaired bridge and the meadow picnic area. Places are limited and must be booked in advance at the Visitor Centre.

Okafor thanked everyone who took part in the repair weekend. 'Cedarbrook only stays open because people give up their Saturdays for it,' she said. 'We're grateful, and we're glad to have the whole loop open again before the busy summer season begins.'
